LETTER OF RECOMMENDATION

DATE: 10/02/2025

To whom so it may concern

I am pleased to write this letter of recommendation for Mr. Yogendra Bharadwaj, a student of the B.Tech program in Computer Engineering (Batch 2020-2024) at Graphic Era (Deemed to be University). I had the privilege of knowing him during his academic journey, and I can confidently state that he is one of the most diligent and talented students I have encountered.

I first met Yogendra when he enrolled in my Compiler Design class during his sixth semester. From the beginning, he demonstrated exceptional discipline, curiosity, and a strong grasp of technical concepts. His dedication to learning and a keen interest in research and innovation set him apart from his peers. He was one of my class's most obedient and outstanding students, and I consider him among my favourite students.

Yogendra's passion for research and technological advancements became even more evident when I was appointed as the project coordinator for his batch. His project, focusing on *Human-Robot Interaction using Generative Artificial Intelligence*, stood out as one of the best projects at Graphic Era that year. The university's director highly appreciated his outstanding work, and the institution even adopted it for further development.

Beyond academics, Yogendra is an excellent researcher, having published multiple research papers and patents. His dedication to innovation and problem-solving is evident in his contributions to research and development. His ability to explore and implement new technological advancements showcases his potential as a promising engineer and researcher.

I strongly recommend Yogendra Bharadwaj for higher studies or any professional endeavour he wishes to pursue. His technical skills, innovative mindset, and unwavering determination will undoubtedly make him an asset to any institution or organization.

Dr. Guru Prasad M S
